

Customer Review Testimonial

Company : Rely Precision Casting (Pty) Ltd t/a RelyIntraCast, a subsidiary of Intakobusi Holdings (Pty) Ltd.

To PED or not to PED

During 2017, a management decision was made to obtain certification in the Pressure Equipment Directive 2014/68/EU for our investment casting company. After numerous discussions with relevant stakeholders, we were introduced to Mr Johann de Beer, the Managing Director of Elinor Konsultante (Pty) Ltd.

This company specialises in the developing, improving, implementation and maintenance of Quality Management Systems, and in particular the implementation of PED systems. We met with the service provider, and found their experience in this field to be invaluable and vitally important to the success of this project.

Once commencing with the development of the project, we were pleased to see rather quick progression of the project, and found the service provider very knowledgeable and willing to assist with any concerns or questions. The development and implementation period spanned approximately 12 months, and within that time, we were able to successfully achieve PED certification audit readiness. Since then, we were successful in obtaining certification for PED 2014/68/EU.

We would recommend the services of Elinor Konsultante (Pty) Ltd to any company that is considering the implementation of these types of management systems.
